

Hands-On Workshop

ORGANICS 101

Understanding the basics of organics is understanding your soil.

In this workshop we will discuss and understand the basics of soil health, organic matter management, compost and plant based teas. How to scout for diseases and monitoring and finally beneficial insects that help protect your crops.

March 23, 2019 9 a.m. - 1 p.m.

700 S Good Latimer Expwy.
